The Santa Barbara-based Kroc Foundation has endowed a $1 million chair at UCSF to support biomedical research and teaching on rheumatic and other immunological diseases.

Chancellor Krevans announced the establishment of the Robert L. Kroc Chair in Rheumatic and Connective Tissue Diseases in late February. He also introduced the first holder of the chair: Edward J. Goetzl, MD, UCSF professor of medicine and director of the Division of Allergy and Immunology. Goetzl is an internationally-known authority on rheumatic and autoimmune diseases, with a basic research interest in the chemical factors, or mediators, involved in the immune response. He also is an investigator in the Howard Hughes Medical Institute Laboratories at UCSF.

The Kroc Chair is named in honor of the brother of the late Ray Kroc, founder of McDonald's Corporation and later founder and sole benefactor of the Kroc Foundation. Dr. Robert Kroc has had a distinguished biomedical research career in universities and industry. Since 1979 he has served as president of the Kroc Foundation and is responsible for initiating the program of research grants and conferences funded by the Foundation.

The Kroc Chair is the last of three research chairs to be established by the Kroc Foundation. The two others are a chair in diabetes and endocrine diseases at Washington University School of Medicine at St. Louis and a chair in neurological diseases at Harvard Medical School.

The Consul General of Italy bestowed the "Commander in the Order of Merit" in the Republic of Italy (an award similar to the French Legion of Honor) upon Chancellor Julius R. Krevans, MD, on Monday, February 25. The special ceremony and invitational reception which followed was held at the new UCSF building at 3333 California Street following a meeting of the UCSF Board of Overseers.

Several hundred civic and community leaders and leaders of the educational, medical and scientific communities were present at the ceremony, at which Consul General Dr. Roberto Rossi made the presentation.

The award was made to Krevans "in recognition of his prestigious position in

On Friday, February 22, Mayor Feinstein announced that the City had reached an agreement with the SF Unified School District to build 160 units of federally subsidized family housing on the site of the old Polytechnic High School. The tentative agreement was still to be ratified by the Board of Supervisors.

Part of the agreement included the City turning over to the School District 1.5 acres of open land at Seventh Avenue and Lawton Street rent free, so the District could build a new campus for the Raoul Wallenberg High School, plus some adjacent land for recreational facilities for the new shool.

In January the School Board had approved a resolution agreeing to receive bids for the Poly High site and stipulating that the site be used only for housing. Both the City and UCSF submitted bids. A few weeks later the Board requested a revised bid from UCSF on only three quarters of the Poly site, so that the remaining area could be used for a new Wallenberg High.

On February 7, UCSF submitted a revised bid which called for a 75-year lease for $2.1 million in the more limited space. UCSF's new proposal was not to demolish the existing buildings but renovate them for 100 units of housing instead of 230, for surface parking of 160 spaces and for a swimming complex in the southwest corner.

On hearing of the Mayor's announcement, UCSF Vice Chancellor Thomas A. Rolinson said that UCSF's main concern was met if the Mayor's plan called for housing that could include students. "What we need is affordable rental housing for our students," Rolinson said. "We are pleased to see this unsafe site developed for affordable rental housing. The sooner this happens, the better."

NEWS BRIEFS

(Krevans Award continued)

the academic world, his national scientific reputation and his help in developing a scientific and academic exchange program for faculty and students between the US and Italy, and particularly between UCSF and the University of Pisa," Rossi declared.

"We are honoring Dr. Krevans as a representative of a campus that has contributed so much to the scientific part of medicine, to the understanding of the social environment in which medicine is developing today and to the solution of economic problems associated with medicine," he said.

Jerry R. Mitchell, MD, PhD, will be the 1985 Troy C. Daniels Lecturer. Mitchell, who is professor of internal medicine and chemical toxicology at the Institute for Lipid Research, Baylor College of Medicine, Houston, will be on campus the week of March 18 to present:

- Mon., Mar. 18: "Peroxidation, Ca^{2+} and Chemical Injury." HSW 301. 4 p.m.
- Wed., Mar. 20: "Alkylation, Ca^{2+} and Chemical Injury." HSW 303. 4 p.m.
- Thurs., Mar. 21: "Glutathione, Ca^{2+} and Chemical Injury." HSW 301. 4 p.m.

A Burroughs Wellcome Scholar for Clinical Pharmacology, Mitchell's research includes clinical pharmacology and toxicology, cardiovascular pharmacology, drug metabolism and biochemical and chemical reaction mechanisms.

The Troy C. Daniels Lectureship honors the late dean of the UCSF School of Pharmacy who died on February 9. A major figure in the development of pharmaceutical education, Daniels joined the UCSF faculty in 1929.

A new group of UCSF faculty, staff and students has formed on campus to organize campus teaching and research activities regarding the threat of nuclear war and related issues. The group wants to establish a permanent center at UCSF to be affiliated with the UC-Systemwide Institute on Global Conflict and Cooperation, says chair Christie Kiefer, PhD, associate professor, Human Development and Aging.

"We anticipate strong support among faculty and students in all four schools and graduate programs," said Kiefer. "We already are planning courses and events for next fall, but there is a great deal more to be done," he added. Anyone wishing to join this new organization should contact Kiefer at LPPI, x77-285 or 566-2348, or write the Group on Health Sciences and Nuclear Conflict, CSBS, Room 237, 1350-7th Avenue.

Some 300 alumni delegates from the nine campuses of the University of California will join together for a full day of lobbying in Sacramento on Tuesday, March 5.

The delegates will be formed into various teams to meet with legislators throughout the day, stressing issues and pending legislation affecting UC.

The program will include a breakfast with guest speaker Willie L. Brown, Jr., speaker of the assembly, and a UCSF luncheon with legislators that afternoon. UC President David P. Gardner will address all alumni delegates later that day, followed by a reception for all UC alumni delegates, legislators and their staffs. The reception will feature food and beverages which in part were developed by UC researchers.

As part of the program the preceding evening, Northern California alumni of UCSF will hear a panel discussion on "AIDS—A Public Health Crisis." Panel members will include: Paul Volberding, MD, chief of medical oncology and director of AIDS Services at SFGH; Jay A. Levy, MD, associate professor of medicine, microbiology, immunology and pathology and research associate, Cancer Research Institute; John Greenspan, BDS, PhD, professor and chair, oral biology, Department of Stomatology; Gayling Gee, RN, MS, head nurse, SFGH AIDS Clinic.

A reception and dinner will follow the seminar at which Chancellor Julius R. Krevans will speak.

For further information call x4723.

The Board of Directors of Children's Hospital Medical Center of Northern California in Oakland has voted to give $50,000 to support the Children's Dental Service. The service is operated at the hospital by the Division of Pediatric Dentistry in the Department of Growth and Development, UCSF School of Dentistry.

If you regularly park in Golden Gate Park, you might want to attend a meeting of the Parks and Planning Committee of the Recreation and Park Commission on Wednesday, March 6, at 7 p.m. in the Hall of Flowers Auditorium, Ninth Avenue and Lincoln Way. The Park Commission will receive public comment on the Golden Gate Park Transportation Management Plan, which includes reducing all-day parking in certain sections of Golden Gate Park. Written comments are welcomed and should be sent prior to the meeting date to City and County of San Francisco Recreation and Park Department, McLaren Lodge, Golden Gate Park, SF, CA 94117. For further information call 558-3182.

Bay Area lawyer Melvin Belli will be on campus Thursday, March 21, to discuss "The Bhopal Disaster" from 8:30 to 10 a.m. in Cole Hall. The talk will be given as part of UCSF's Occupational and Environmental Medicine Grand Rounds.

The Bhopal disaster occurred earlier this year when a chemical explosion at a Union Carbide plant released toxic gas killing some 2,000 people and injuring several thousand others in India. Belli has filed a suit in a US court against Union Carbide on behalf of the victims of this disaster.

International Women's Week will be celebrated on campus beginning March 4 with the following free events:

- Mon., Mar. 4: "Home Movie." An autobiographical film telling the story of how a woman came to recognize her love for other women. "A Comedy in Six Unnatural Acts." A satire on the stereotyped images of lesbians. Cole Hall. Noon.
- Tues., Mar. 5: "With Vision, Convictions and a Voice." A performance by People Speaking depicting a meeting between Mary Harris "Mother" Jones, the turn-of-the-century labor organizer, and the eminent black educator, Mary McLeod Bethune. Cole Hall. Noon.
- Wed., Mar. 6: A discussion on alternative treatments and current controversies in women's health care by Kay Weiss, editor of *Women's Health Care, A Guide to Alternatives.* HSW 300. Noon. Will include book signing from 1 to 1:30 p.m.
- Thurs., Mar. 7: Poetry reading by UCSF women poets Gabrielle Daniels, Meryl Glass, Barbara Paschke, Ida VSW Red, Carol Tarlen and Nellie Wong. S 214. Noon.
- Fri., Mar. 8: Women's political music by Linda Hirschhorn, Tay Holden and Kate Perry. Millberry Union combined lounges. Noon to 1:30 p.m. Resource tables to be set up 11:30 a.m. to 1:30 p.m.

All events are cosponsored by the UCSF Women's Resource Center and the Committee on Arts and Lectures. For further information call x5836 or x2571.

Infectious disease expert Francis A. Waldvogel, MD, is the 14th annual Henry F. Brainerd Lecturer. Professor and chief of medicine at Hospital Cantonal of the University of Geneva, Switzerland, Waldvogel will discuss "Foreign Body Infections: Clinical Aspects and Pathogenic Factors" on Tuesday, March 12, at 11:30 a.m. in Carr Auditorium at SFGH.

The following day, Waldvogel will deliver a lecture on "Osteomyelitis" at 2:30 p.m. in Cole Hall.

An expert on host defenses and foreign body infections, Waldvogel is well known for his clinically relevant articles on osteomyelitis, which recently were published in the *New England Journal of Medicine.*

The lectureship is named for Brainerd, who established the Infectious Disease Laboratory at SFGH. He was chair of the Department of Medicine from 1956 to 1964 and chief of the SFGH Medical Service from 1951 to 1956 and 1964 to the time of his death in 1979.

A program for studying conscious and unconscious mental processes, which may lead to new understandings of neurotic symptoms, has been established on campus.

The first year of the long-range program will be supported by a $850,000 award from the John D. and Catherine T. MacArthur Foundation to Mardi Horowitz, MD, professor of psychiatry.

The new "Program for the Study of Conscious and Unconscious Processes" may shed light on such complex problems as repetitive irrational choices, intrusive memories, unwanted fantasies, slips of the tongue and states such as reverie, dreams and hypnosis. It also may help researchers understand what produces sudden creative solutions to difficult problems and why some persons have inappropriate attitudes about themselves and others.

Horowitz said an important aim is to develop a scientific understanding of how unconscious organizing processes in the mind affect conscious thought. He explained that staff in the program will be involved in basic research, will establish links with scientists throughout the world and will host a series of workshops.

The new program will be located in the Center for the Study of Neuroses in LPPI, which is directed by Horowitz.

Representatives from all nine UC campuses will celebrate the 117th All-University Charter Day on Friday, March 22, beginning at 10:30 a.m. in Zellerbach Auditorium at UC-Berkeley. Space is limited. Call Diane Dillon at x2888 for tickets.

As children move from childhood to adolescence, major changes take place in their bodies, in their minds and in their feelings. These changes can happen very fast and can be very confusing to parents.

Beginning Monday, March 11, there will be a five-part lecture/discussion series on early adolescent changes. Sponsored by the Division of Adolescent Medicine, the lectures will address bodily changes in early adolescence, sexuality, intellectual and emotional development and changes in relation to the family. The lectures will be given by Marna Cohen, LCSW, and William Shore, MD, in Room 267, Ambulatory Care Center.

Fee for the series is $35 per person or $50 per couple. For further information call x2184.

The Committee on Research of the Academic Senate now is accepting applications for individual investigator research grants. All Academic Senate members, non-Senate faculty and those with pending appointments are eligible to apply for funding in all subject areas. Faculty on sabbatical are eligible for supplies and equipment only. Residents, fellows, postdoctoral, graduate, and undergraduate students, and staff are not eligible. Application deadline is Monday, April 8. For further information contact Annie Bruster in Room U 100H or call x1307.
